

ngx_list.h Documentation :

Macros Defined :

```
#define NGX_RADIX_NO_VALUE (uintptr_t) -1
```

Type Definitions :

```
typedef struct ngx_list_part_s ngx_list_part_t;
```

Data Structures :

```
struct ngx_list_part_s {  
    void            *elts;  
    ngx_uint_t      nelts;  
    ngx_list_part_t *next;  
};
```

```
typedef struct {  
    ngx_list_part_t *last;  
    ngx_list_part_t part;  
    size_t          size;  
    ngx_uint_t      nalloc;  
    ngx_pool_t      *pool;  
} ngx_list_t;
```

Functions Defined :

```
ngx_list_t *ngx_list_create( ngx_pool_t *pool,  
                             ngx_uint_t  n,  
                             size_t      size  
                             )
```

```
void *ngx_list_push( ngx_list_t *list  
                    )
```

```
static ngx_inline ngx_int_t ngx_list_init( ngx_list_t *list,  
                                           ngx_pool_t *pool,  
                                           ngx_uint_t  n,  
                                           size_t      size  
                                           )
```
